CPUC: Overview of Proceedings Affecting Local Governments

February 14, 2019
Lee Palmer
Deputy Director
Safety and Enforcement Division
lee.palmer@cpuc.ca.gov

Agenda and Purpose

• CPUC Wildfire Mitigation Activities
• SB 901 implementation (R.18-10-007)
• De-energization (R.18-12-005)
WILDFIRE MITIGATION ACTIVITIES

Safety and Enforcement Division (SED)
Wildfire Role

The Safety and Enforcement Division works diligently to ensure that regulated services are delivered in a safe manner.

<table>
<thead>
<tr>
<th>Before the Fire:</th>
<th>During the Fire:</th>
<th>After the Fire:</th>
</tr>
</thead>
<tbody>
<tr>
<td>-Build working relationships with both state partners and regulated utilities.</td>
<td>-Maintain awareness of current wildfire operations.</td>
<td>-Assess utility damage and mitigation efforts effectiveness.</td>
</tr>
<tr>
<td>-Review utility mitigation and prevention efforts.</td>
<td>-Participate in CalOES working groups as required.</td>
<td>-Participate in CalOES/CALFIRE/Utility after action reviews for lessons learned.</td>
</tr>
<tr>
<td>-Remain up to date on wildfire conditions and threats.</td>
<td>-Keep in contact with regulated utilities to ensure grid remains stable and reliable.</td>
<td>-Investigations (based on CALFIRE findings)</td>
</tr>

Wildfire Mitigation Plans
(A Short History)

• In accordance with General Order 166, regulated utilities are required to submit annual Emergency Response Plans which include a section on wildfire preparedness.

• In 2017, Senate Bill 1028 created the requirement for utilities to provide stand-alone Wildfire Mitigation Plans.

• In 2018, Senate Bill 901 expanded on the requirements for Wildfire Mitigation Plans and required CPUC approval of these plans.

Current Wildfire Mitigation Efforts

• GO 95
  – Removal diseased/dead trees.
  – Vegetation clearance in fire threat zones.
  – Utilities may apply additional clearances based on location of vegetation, local climate, elevation, fire risk.

• GO 166
  – Electric utilities to provide Emergency Preparedness & Response Plans.

• SB 901
  – Electric utilities submit annual wildfire mitigation plans.
  – CPUC reviews and approves mitigation plans.

• Rulemaking 15-05-006
  – Adopted Fire Threat Maps and established Fire-Safety Regulations.

• CPUC/CalOES/CAL FIRE MOU
  – Provides the foundation for emergency planning and response.
CPUC Efforts to Supplement Wildfire Mitigation

MOUs with CAL FIRE and CalOES

Established shared priorities and specific responsibilities for each agency

Initial steps towards multi-stakeholder engagement efforts to:

- Identify and mitigate wildfire risks
- Establish sufficient emergency planning and response programs

SENATE BILL (SB) 901 &
OIR R.18-10-007
Senate Bill 901 (SB 901)

- Signed into Law by the Governor of California: September 21, 2018

- Requires each Wildfire Mitigation Plan developed by an electric IOU to include additional elements:
  - vegetation management,
  - protocols for disabling reclosers,
  - deenergizing portions of the electric distribution system,
  - inspections of electric infrastructure, and
  - actions the electric IOU will take to ensure that its system will achieve the highest level of safety, reliability, and resilience, including modernizing and hardening its infrastructure.

Senate Bill 901 (SB 901)

- Requires an independent evaluator to review and assess electric IOU compliance with its plan.

- Authorizes an electric IOU to recover in rates the costs of the independent evaluator.

- Requires the CPUC to approve the plan and to consider the independent evaluator’s findings, as specified.

- Requires the CPUC to assess penalties on an electric IOU that fails to substantially comply with its plan.
Senate Bill 901 (SB 901)

- Requires the CPUC and CAL FIRE to enter into a Memorandum of Understanding
  - cooperatively develop consistent approaches and share data related to fire prevention, safety, vegetation management, and energy distribution systems and to share results from various fire prevention activities, including relevant inspections and fire ignition data.

SB 901 Impact: Changes Specific to WMPs

- Commission approval of WMPs required
  - Statutory deadline of 3 months following submittal
  - Deliberative review process open to public
- Consideration of dynamic climate change risks
- WMPs contain 20 individual elements
- Annual compliance reviews by Commission
R.18-10-007: SB 901 Implementation

Initiated by the Commission on October 25, 2018 & will focus on:

- Implement the provisions of SB 901
- Provide guidance on the form and content of the WMP
- Provide a venue for review of initial plans
- Develop and refine the content of and process for review and implementation of WMP to be filed in future years

2 Workshops on SB 901 Implementation:

- Feb. 13, 2018 in San Francisco – review and presentation of initial WMP’s submitted by IOUs
- Second workshop is TBD and is dependent on feedback received during the Feb. 13 workshop

R.18-10-007: SB 901 Implementation (WMPs) OIR Schedule

SB 901 OIR
Current Status and Next Steps

• Utility plans submitted on February 6, 2019
• SED team has been meeting with CAL FIRE to coordinate an efficient review
• Informational workshops planned for February 2019
• Decision on plans expected in May 2019

How Does This Affect My Community?

• The Majority of California is at risk from Wildfires
• Wildfire Mitigation Plans will identify the Utility’s priority of effort
• Know your utility
• Your utilities have responsibilities and obligations
More Information on Wildfire Mitigation

Utility Wildfire Mitigation Plans (SB 901)

On Oct. 25, 2018, the CPUC acted to further protect the state from wildfires related to electric facilities by setting the framework to provide guidance on initial utility wildfire mitigation plans, and inviting the input of all stakeholders in guiding its approach. Read more.

DE-ENERGIZATION & OIR R.18-12-005
**De-Energization**

- The State’s investor-owned utilities have general authority to shut off electric power to protect public safety under California law.

- Utilities have recently developed programs to exercise this authority during severe wildfire threat conditions as a preventative measure of last resort.

  - [http://www.cpuc.ca.gov/deenergization/](http://www.cpuc.ca.gov/deenergization/)

**De-Energization Resolution (ESRB-8)**

- CPUC adopted rules that utilities must follow in the event of a de-energization event during periods of extreme fire hazard to prevent fires caused by strong winds.

**Utilities must:**

- Hold informational workshops
- Notify customers before shutting off power if feasible
- Notify first responders, critical facilities, CPUC, and other entities ahead of time as feasible.
- Submit de-energization outreach plans to CPUC.
- Submit a report to the CPUC within 10 business days after each de-energization.
R.18-12-005: De-energization

Initiated by the Commission on Dec. 13, 2018 & will focus on:
- Developing best practices and evaluation criteria
- Ensuring coordination with first responders
- Mitigating impact on vulnerable populations
- Ensuring consistency in noticing and reporting of events
- Examining ways to reduce the need for de-energization

2 Workshops on de-energization:
- Dec. 14, 2018 in Santa Rosa – impacts on vulnerable populations
- Jan. 9, 2019 in Calabasas – impacts on first responders and local governments

Summer 2019
De-Energization OIR
Current Status and Next Steps

- Informal workshops have been completed
- SED team continues to meet with utilities to review de-energization reports, outreach efforts, and procedures
- Prehearing Conference (PHC) was conducted on February 6, 2019
- Decision on de-energization expected in summer 2019

How Does This Affect My Community?

- Your Community may be de-energized and must have a plan.
- Your utilities are required to have de-energization plans and procedures.
- Build relationships now
