

Information about housing element non-compliance

A flyer developed by HCD will be available soon. This one-pager will have information on the consequences of a non-compliant housing element and the benefits of a compliant housing element. This flyer can be used to educate and inform the public and local elected officials.

Please email the HCD TA Team at earlyactionplanning@hcd.ca.gov in 2-3 weeks for a copy of the final document.

Additional resources for local elected officials such as city council members and planning commissioners

To help city and county leaders better navigate complex housing issues in their communities, ILG in partnership with HCD will have webinar and trainings available in two tracks: one of city council members and county supervisors starting April 1 and the second track will be available for planning commissioners starting late summer.

The webinar series for local elected officials starting April 1 will feature subject matter experts on land use and housing, legal regulations and parameters and community engagement. This series will provide information and best practices, facilitate discussion and answer questions to help local governments better address housing issues in our communities

Registration: www.ca-ilg.org/post/tackling-californias-housing-crisis-webinar-series [ca-ilg.org].
